Founder & CTO

Bonifade Technologies

May 2022 — Present

- Founded and scaled a software company delivering solutions across web, mobile, desktop, and AI.
- Set technical vision, architecture standards, and engineering best practices for the team.
- Lead a growing team of engineers, designers, and project managers.
- Oversaw delivery of 20+ client projects spanning hospitality, education, fintech, and logistics.
- Established CI/CD pipelines, Docker-based deployments, and cloud infrastructure.

Lead Software Engineer

Meeras Software Solutions

2021 — Dec 2023

- Provided leadership and guidance to the development team.
- Oversaw the software development lifecycle ensuring timely delivery.
- Architected and built a School Management System for multi-tenant use.
- Mentored junior developers, fostering skill development and growth.

QA Assurance Engineer

54links

Aug 2025 — Nov 2025

- Performed manual and automated QA testing across the full product lifecycle — from project kickoff to product launch.
- Authored detailed bug reports, test plans, and test case documentation.
- Identified critical issues early, suggested concrete fixes, and iterated with the engineering team until resolution.
- Ensured product quality standards were met before each release milestone.
- Collaborated cross-functionally with developers and designers to maintain a high-quality user experience at launch.

Software Developer Consultant

9jahotel.com

Dec 2023 — Present

- Secured and successfully executed a contract for the RoomStatus & 9jahotel project.
- Designed system architecture for scalability, security, and performance.
- Developed and deployed full systems from inception to production.
- Designed and implemented RESTful APIs for seamless mobile app integration.

Laravel Developer

Westpoint Consult Limited

- Introduced Docker for containerized deployment, enhancing scalability.
- Optimized database queries, achieving a 3x speed improvement.
- Provided comprehensive documentation and maintained legacy systems.

Web Developer

AI-Ansar Foundation

Oct 2020 — Jan 2021

- Managed portfolio of affiliate and subsidiary websites with performance enhancements.
- Designed custom plugins and advanced functionalities to optimize user experience.
- Coordinated with cross-functional teams for seamless integration of web solutions.

FEATURED PROJECTS

MyRoomStatus (Hotel PMS) - myroomstatus.com
